

## **The First ASEAN Seamen Skills Training**

On 30th June, the First ASEAN Seamen Skills Training was holding. Building upon the strategy of 'the Belt and Road', Navigation College actively explores and practices according to this training.

This term training lasts 2 weeks, the foreign trainers were trained in a professional way which bases on their actual levels to satisfy the needs of the companies, and the courses combined the theory and practice from the navigational actual needs. Theoretically, focus on the trainings of personal safety, labor protection, vessel pollution and so on, which aims to improve the awareness of the crew members' rights and protect personal safety and marine environment; in practice, they were trained from the skills of actual needs, such as: fire fighting, steering and so on, they were also taught from internationalization, standardization and professionalization, they are able to gain advanced experience and cover the shortage, therefore, both school and trainers promoted common development.

The following pictures show the trainings and life in Weihai Campus of SDJTU:
